Coyote Creek Parkway North

From: Williams Street

To: Metcalf Park in San José

Length: 12.6 miles one-way; car shuttle possible.

Elevation Gain/Loss: 145 feet/80 feet one-way

Accessibility: Hikers, equestrians, and bicyclists; wheelchair users on most of trail

Coyote Creek travels 31 miles from the Diablo Range to San Francisco Bay. On this trail segment, follow the creekbed through shady riparian cover, parks, developed areas, and open fields to Metcalf Park's freshwater lagoons, the habitat for many year-round and migratory bird species. The wide paved trail travels a nearly level course and is an excellent bike ride, popular with families on bicycles, especially on weekends. A short, 1.1-mile on-street detour will lead you to the last section of the trail from Phelan Ave to Williams Street.

This trail description is excerpted from the 2019 Guidebook. For details on all trails, trailheads and more [buy the book](#) from Wilderness Press.
